

ALTA

Ultimate Automatic Bag Filler
for Roll Products and Beyond

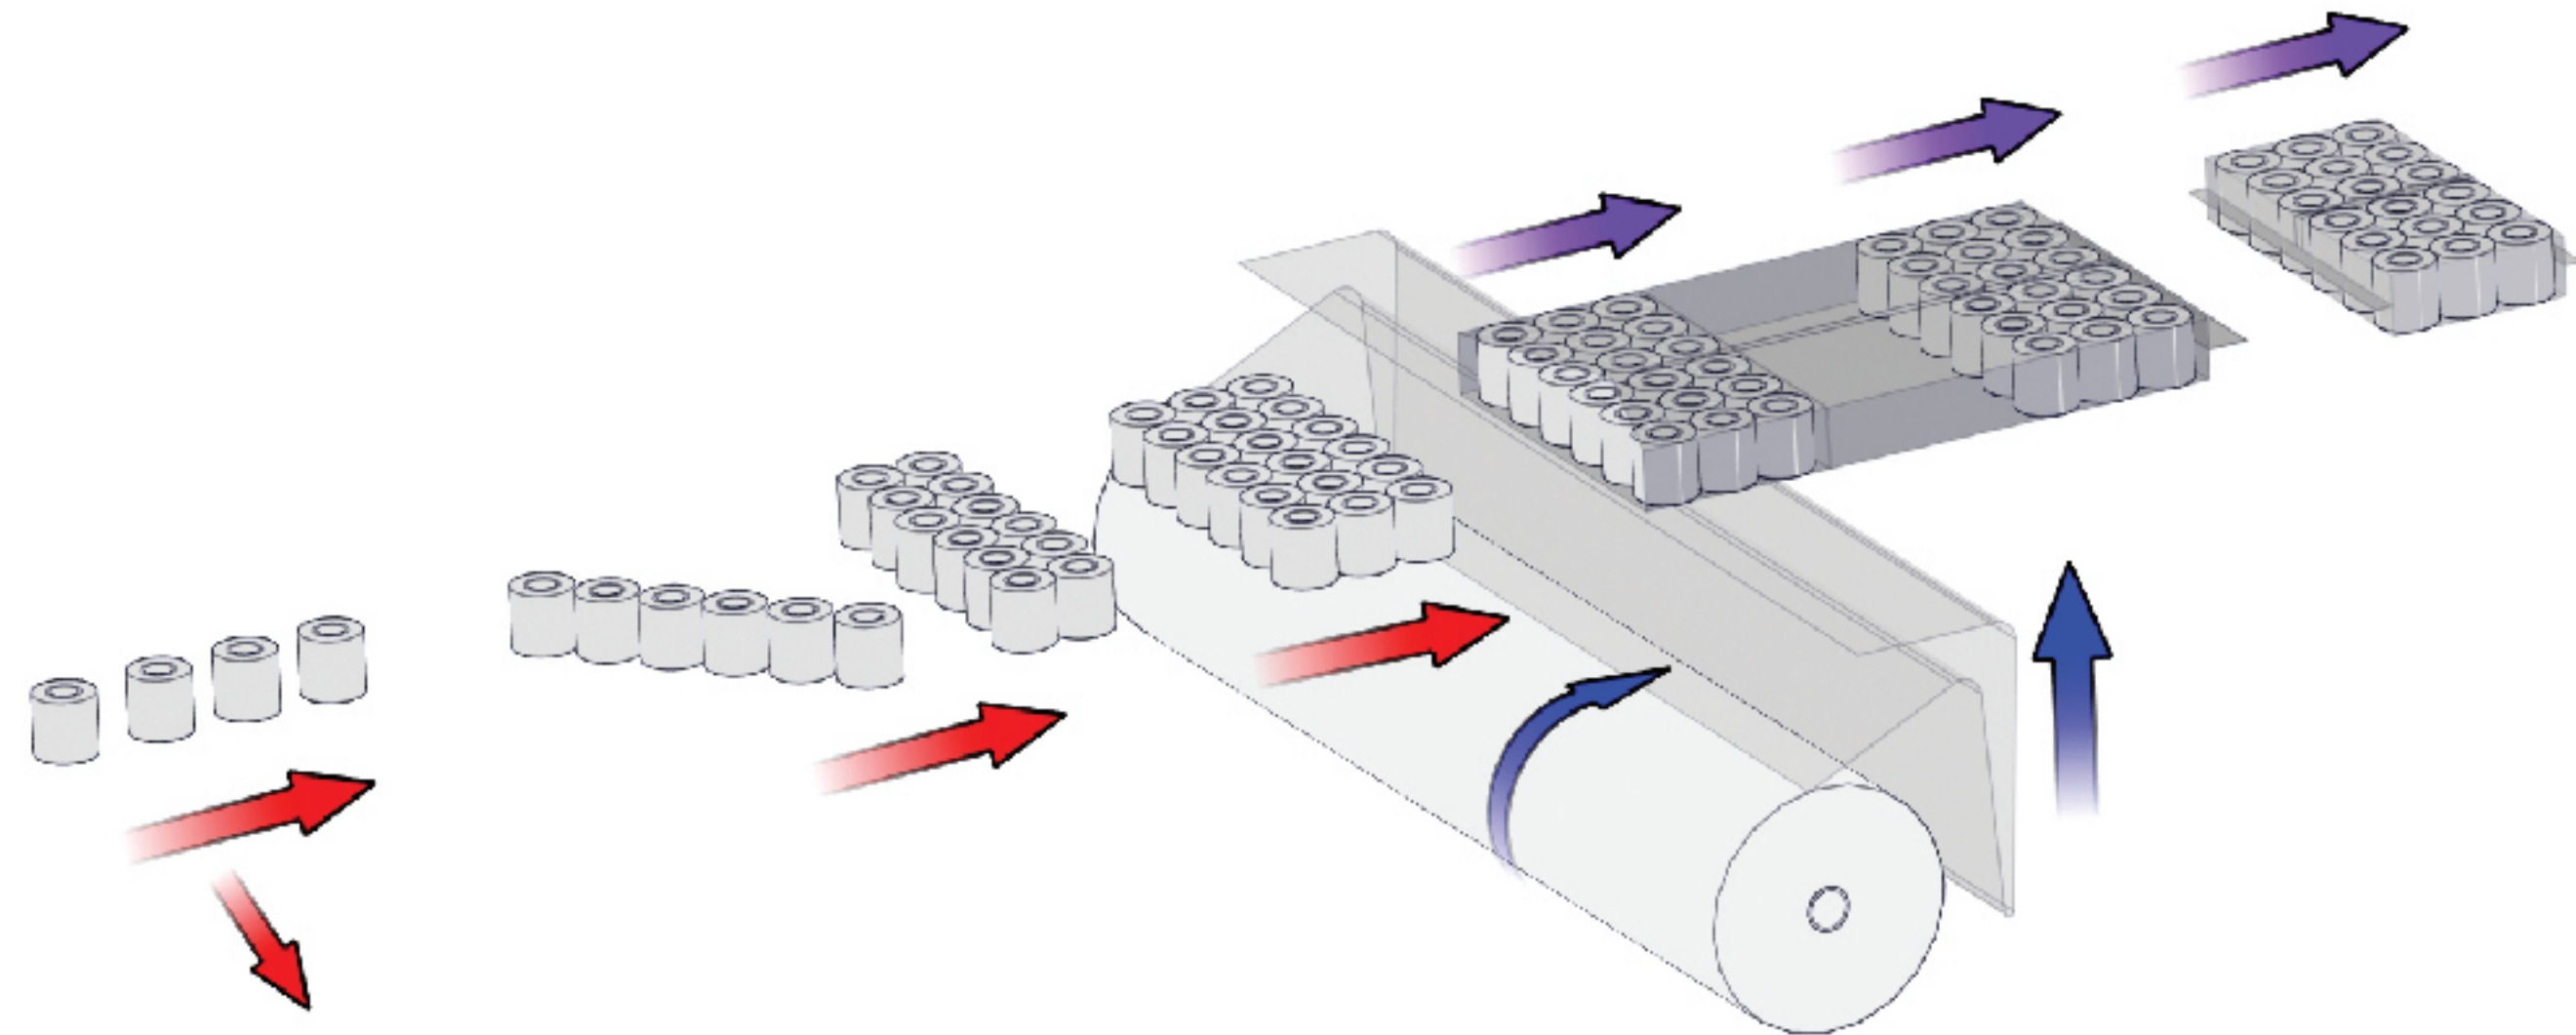

ALTA, the most advanced bundler in STAX portfolio is designed to accommodate a huge number of bundle configurations of various roll and folded products. It comes with standard elevator module where products are stacked and layered in the required configuration. It is also equipped with build-in upender module which ensure reliable and impeccable bundling of single kitchen towels and other unstable products. Switching between standard mode and work with upender module is done with a simple and effortless adjustment. On top of all mentioned, ALTA air extraction system will secure superior bundle quality at speed of more than 25 bundles/min.

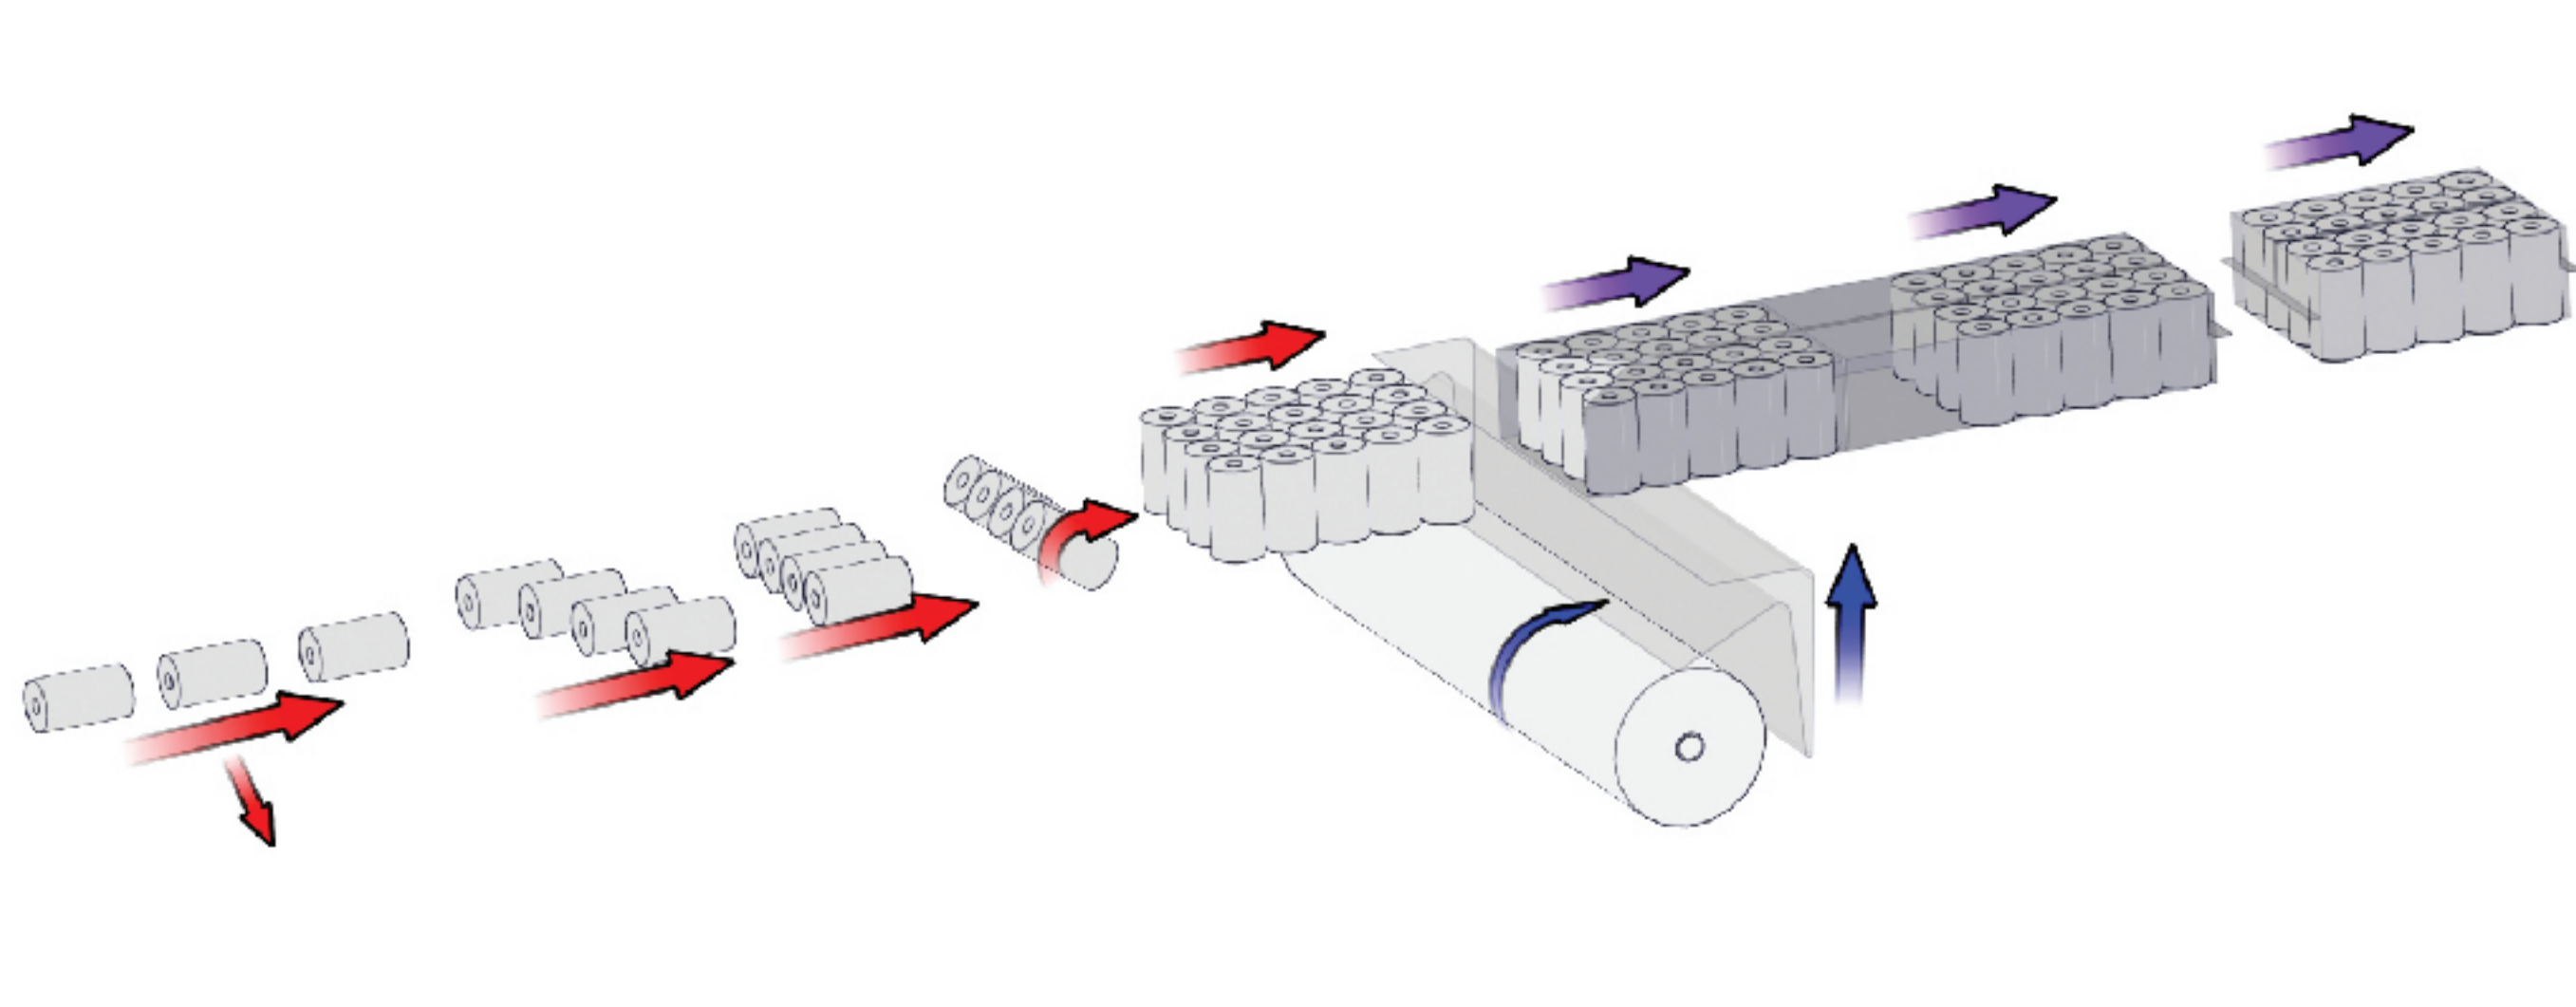

Characteristics

- Air exhausting system
- Single roll bundling
- Various infeed options (single arm, dual arm, launchers)
- Integrated Upender module
- Up to 8 lane and 4 layer configuration
- Bundling with PE, LDPE, POF - with printed film
