VERTIS-RI

Produce wet wipes from biodegradable materials – with the best user experience

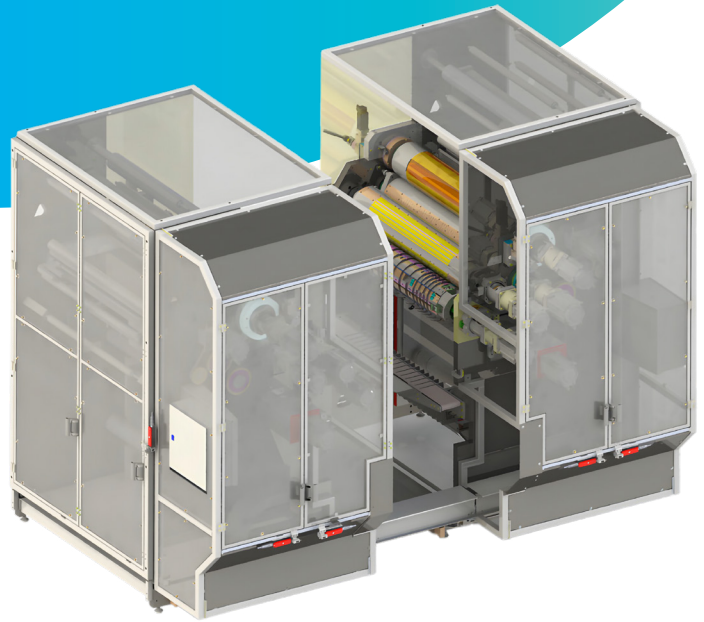

Paper Converting
Machine Company

VERTIS-RI

Interfolded flat-pack

When it comes to end user experience, the Vertis-RI produces the best finished product in the market. With its continuous interfold we ensure a perfect dispensing from the pack. Dispensing of the sheet in the stronger Machine Direction (MD) results in perfect dispensing even with very sensitive biodegradable raw materials. Zero pop-up breaks and optimum product quality in use is our new standard.

- Wide range of materials and mainly biodegradable nonwoven
- Better dispensing quality
- Fully interfolded packs with up to 100 sheets
- Very compact machine design
- Quick changeover modules with open frames for full inside access
- Easy even count change via HMI
- Auto-splice function for the unwinds
- Patented wetting technology
- Patented gripper-tucker technology
- Fewer operators required

Dispensing wipes produced with current technology
