Change for the better

ARCUS

Flexible, fast and efficient machines
for menstrual-care products

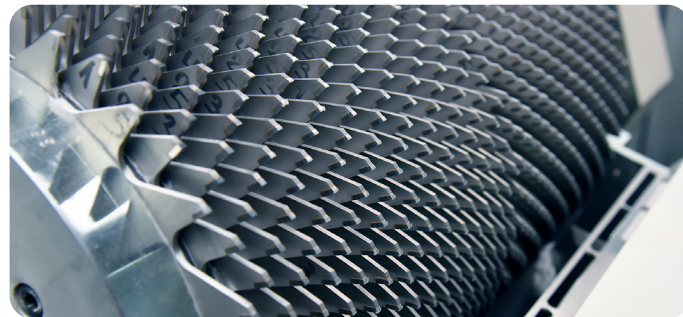

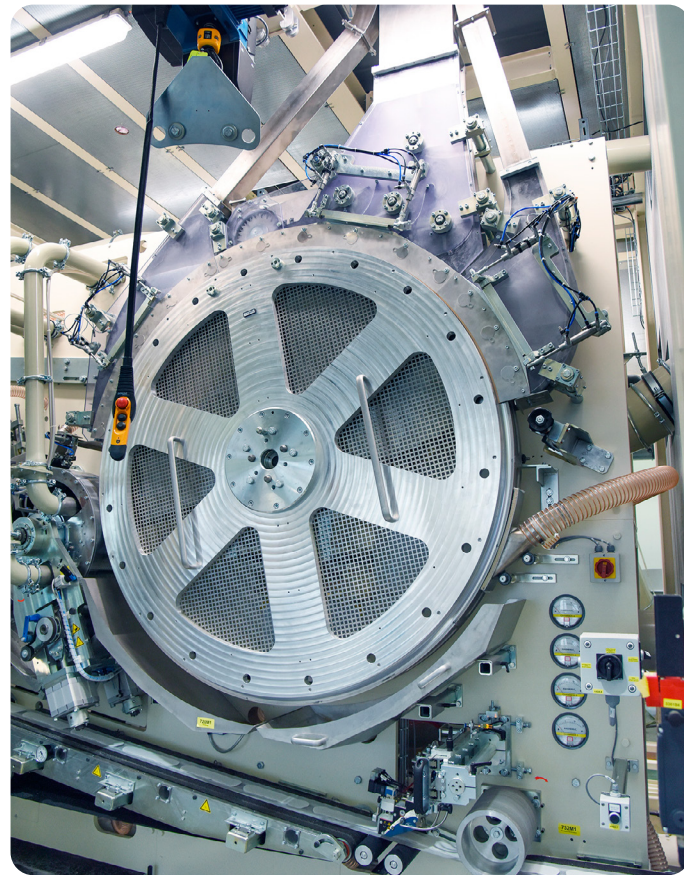

W+D Winkler +
Dünnebier

ARCUS-SN

Perfect cores and highest flexibility to create sustainable menstrual pads

ARCUS-SN is the answer to your needs in menstrual pad production.

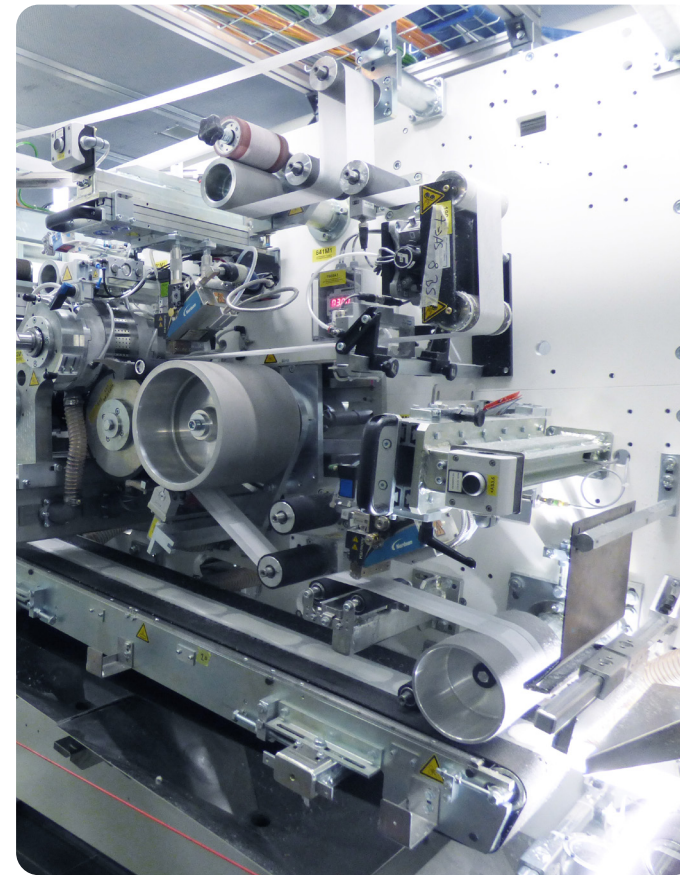

- Excellent CORES made of fluff + SAP, calendered to optimum density and your desired caliper of discretion
- Innovative vacuum system to reduce ENERGY consumption and CO₂ footprint
- PAPER wrapping

- OVERNIGHT sizes with wide back-end for perfect leakage protection
- XL-SIZES with 2nd pair of wings
- EXTRA FEATURES available like perfume, elastic barriers, 2nd core, liquid-storage layer between core and backsheet, and many more

Up to **1600** products/minute

ARCUS-PL

High output and top quality for pantyliners

ARCUS-PL leads you to the future of pantyliner production.

- PRECISE process, allowing perfect match of all applied embossings, printings, core shape and outer shape even for smallest products
- Excellent WEB-TENSION CONTROL, a key to high speeds and good product quality
- Anatomical, flex or Tanga SHAPE
- End-of-line VERSATILITY: Flat, folded non-wrapped / single-wrapped / paper-wrapped / TO GO multistacks

- LENGTHWISE production (1- or 2 lanes) allows the adding of nonwoven barriers, and is suitable for all modern topsheet types
- CORES made of roll-/spool-/festooned airlaid, or inline with fluff
- LIGHT-INCO pantyliners in larger sizes and with SAP
- Turnkey line including our turnplate and high speed STACKER

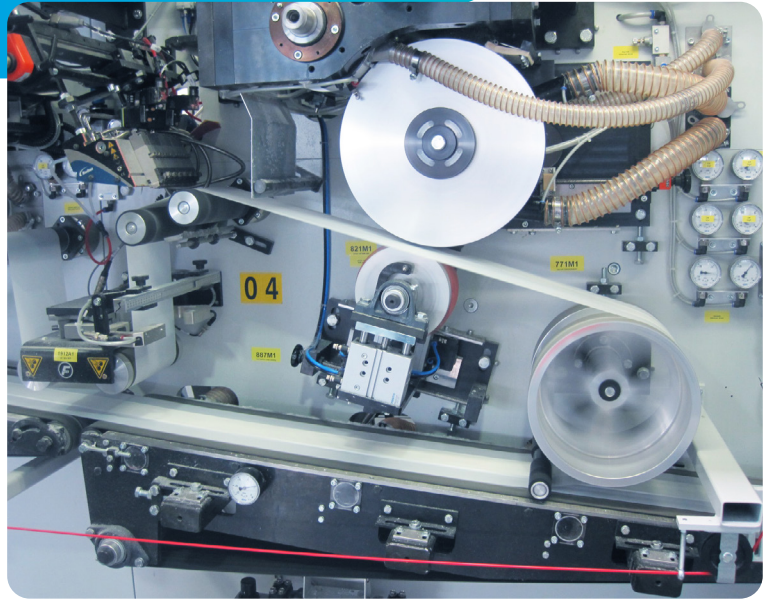

Up to **3000** products/minute

PERFECT process

PERFECT product

Offering all features that modern products do require, the ARCUS machine family lets you have a LEAD over your competitors: Inline flexoprinting, sustainable raw-materials, modern HMI and industry 4.0 solutions.

We give you more than just machines – we are your PARTNER from the initial phase of defining the best product + machine concept, through training and start-up phase, up to decades of reliable machine service and upgrades.

Your benefits

- Top FLEXIBILITY granted by a large choice of pre-designed options, plus a deep expertise in creating customized solutions.
- SUSTAINABLE concepts to eliminate or minimize single-wrap packaging
- Long-lifetime approach: Easy UPGRADE with additional product sizes and product features
- Inline FLEXOPRINTING in perfect quality
- QUICK size-change
- High overall EFFICIENCY thanks to inline product-quality control, reliable branded components and a proven machine design
