Change for the better

FORTENW

GENIUS

Produce the best rolled wipes

 Paper Converting
Machine Company

Highly efficient canister rolls with FORTE-NW series

- High-quality product from the core to the tail
- Flexibility in feeding different widths of parent rolls
- Better tension control results in better product quality throughout the roll
- Fast product changeovers
- Simplicity in operation
- Benchmarking availability and productivity
- Change of perforation via HMI
- Optional second perforator package
- Up to 250 rolls/min and up to 320 rolls/min versions

Canister rolls with IR450 Flex

The semi-automatic rewinder model IR 450 FLEX has been designed to convert nonwovens, tissue paper, crepe paper, industrial rags, kitchen towel, and other similar products without or with core.

INVISIBLEO

Coreless Winding

The core of sustainability

PCMC's patented InvisibleO coreless technology revolutionizes log winding with recirculating, recyclable thermoplastic mandrels, delivering both sustainability and cost-efficient production.
