

ULTIMA

Revolutionary High-Speed Wrapper  
with Unmatched Efficiency

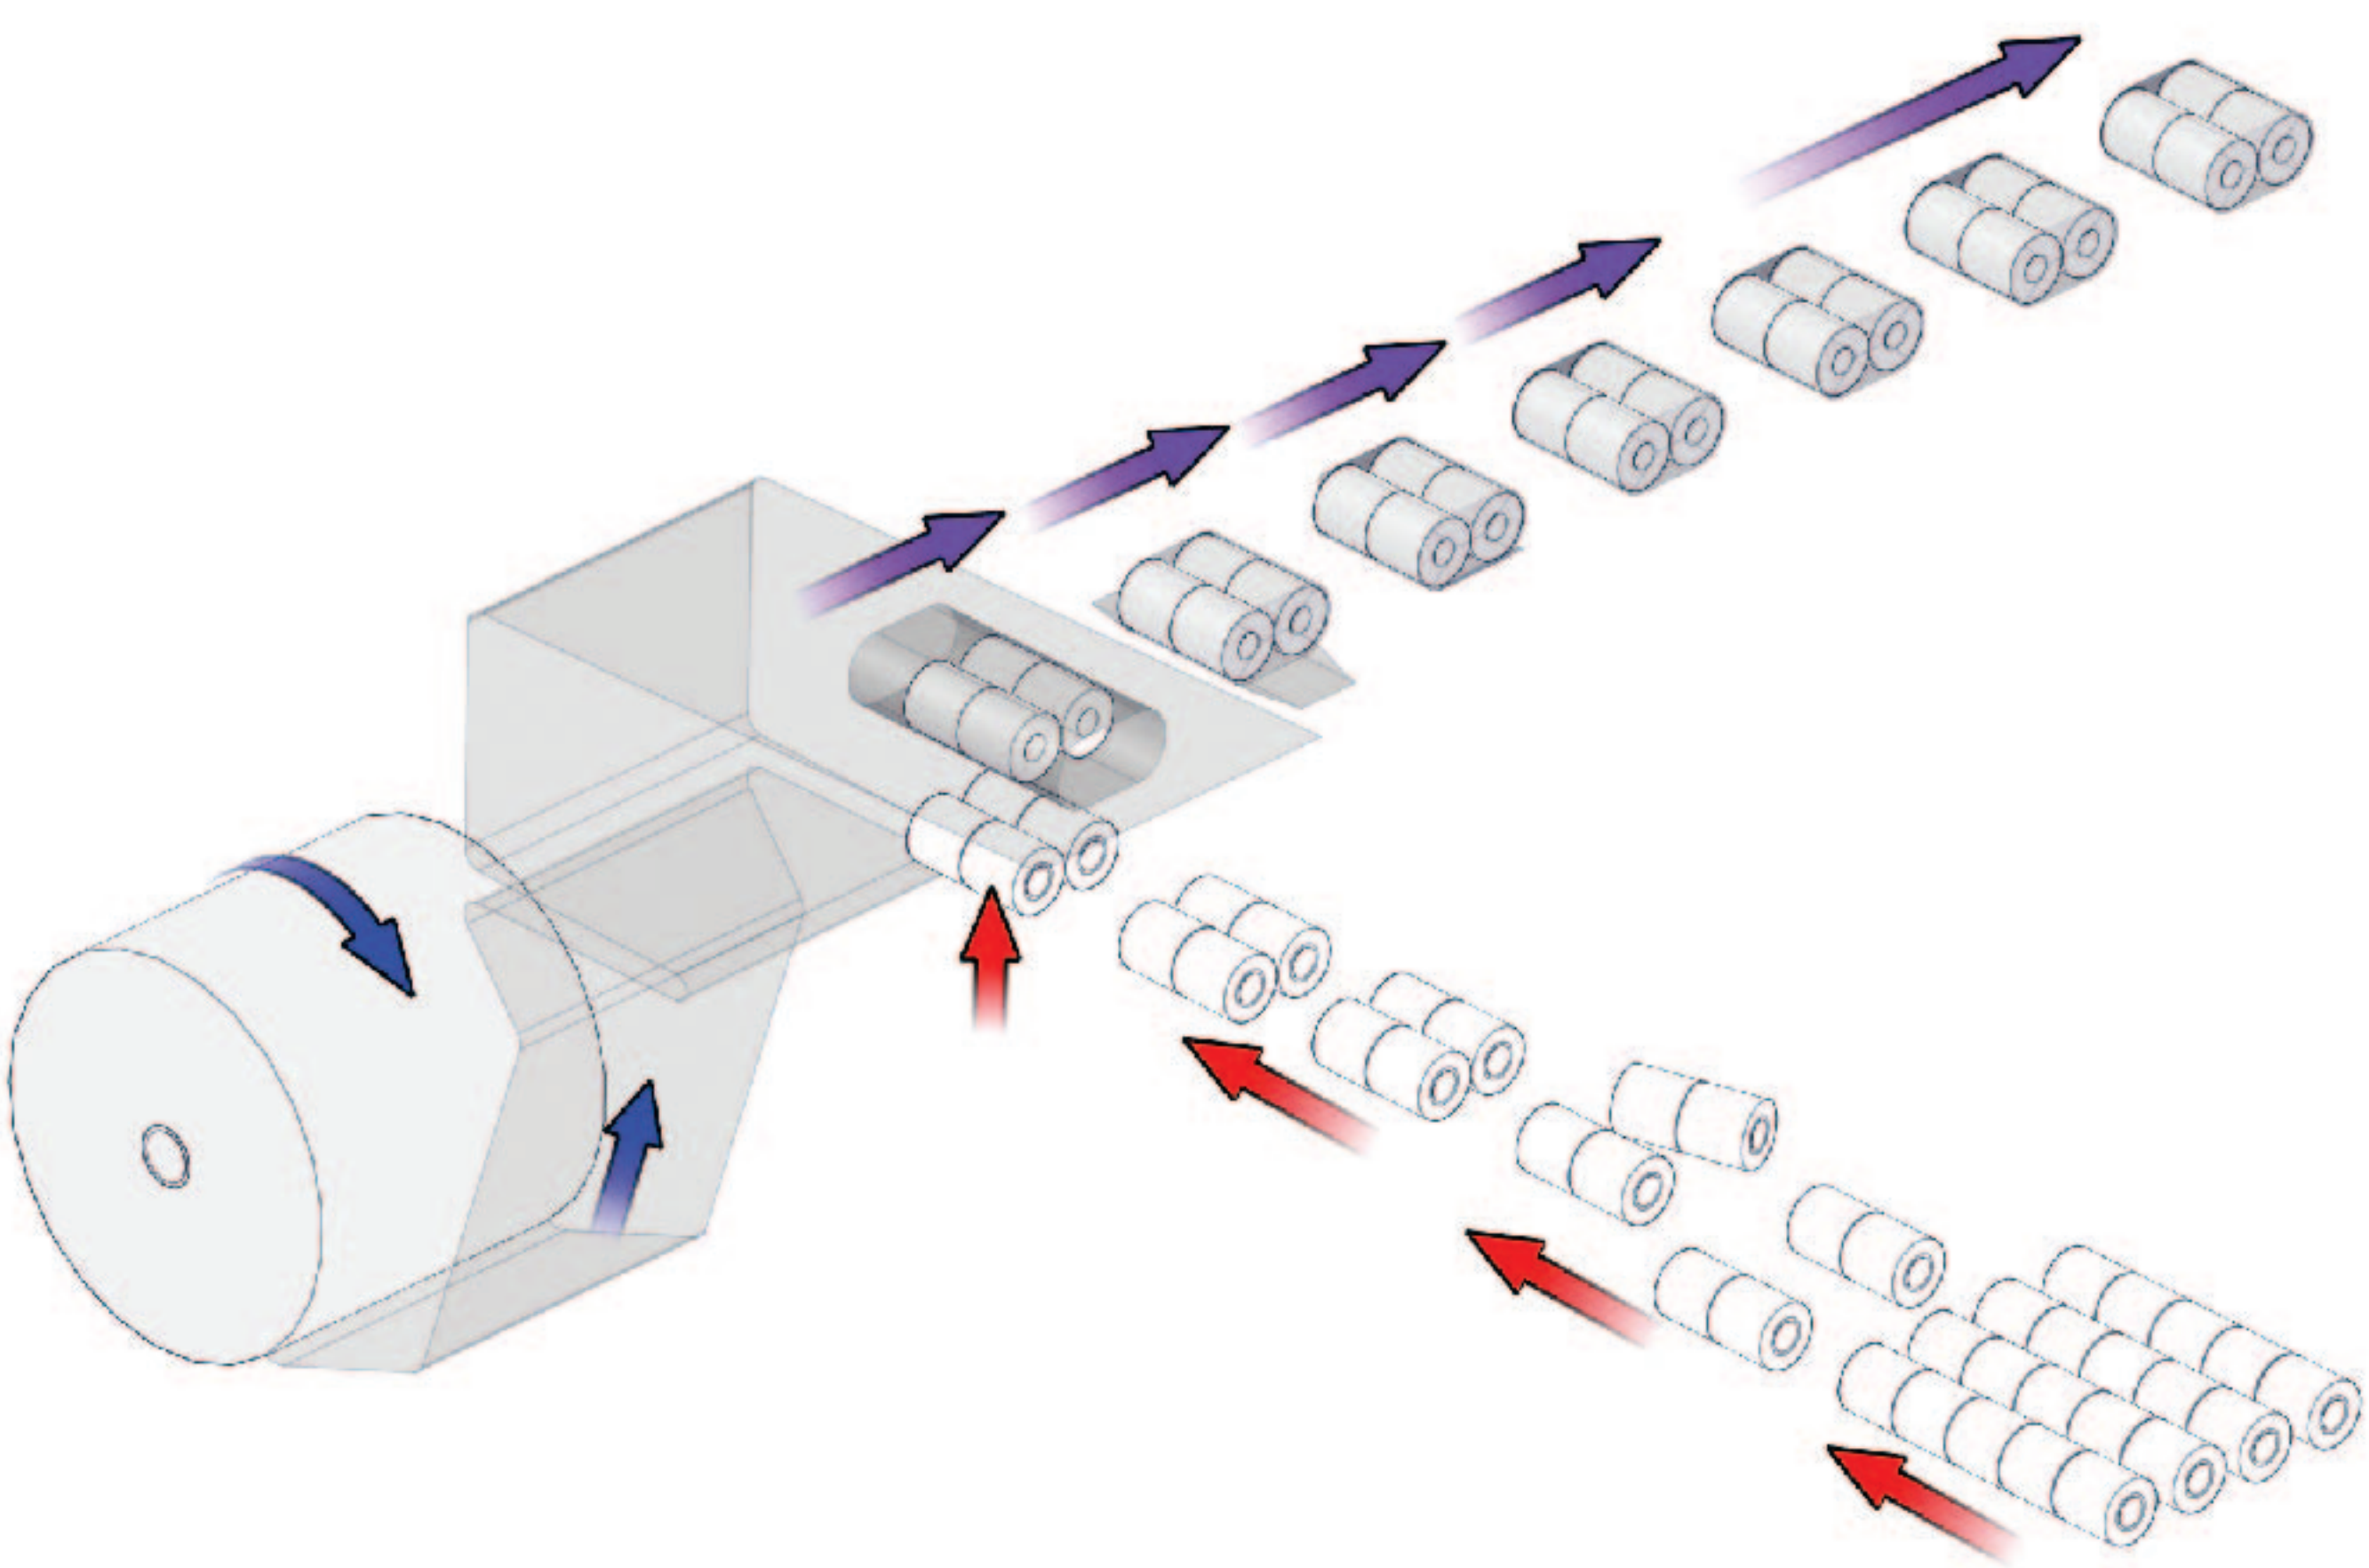

**ULTIMA** is a new generation wrapper with highest production speed on the market and 40% less energy consumption comparing to known conventional models which declare same or similar speed. ULTIMA is the first machine on the market using iTRAK which allows to maintain perfect shape of the packs, even when running at speeds above 200 packs/min, at the same time granting extremely easy and fast changeover time. This supreme and impressive wrapper is undoubtedly a revolution in tissue packaging!

Characteristics

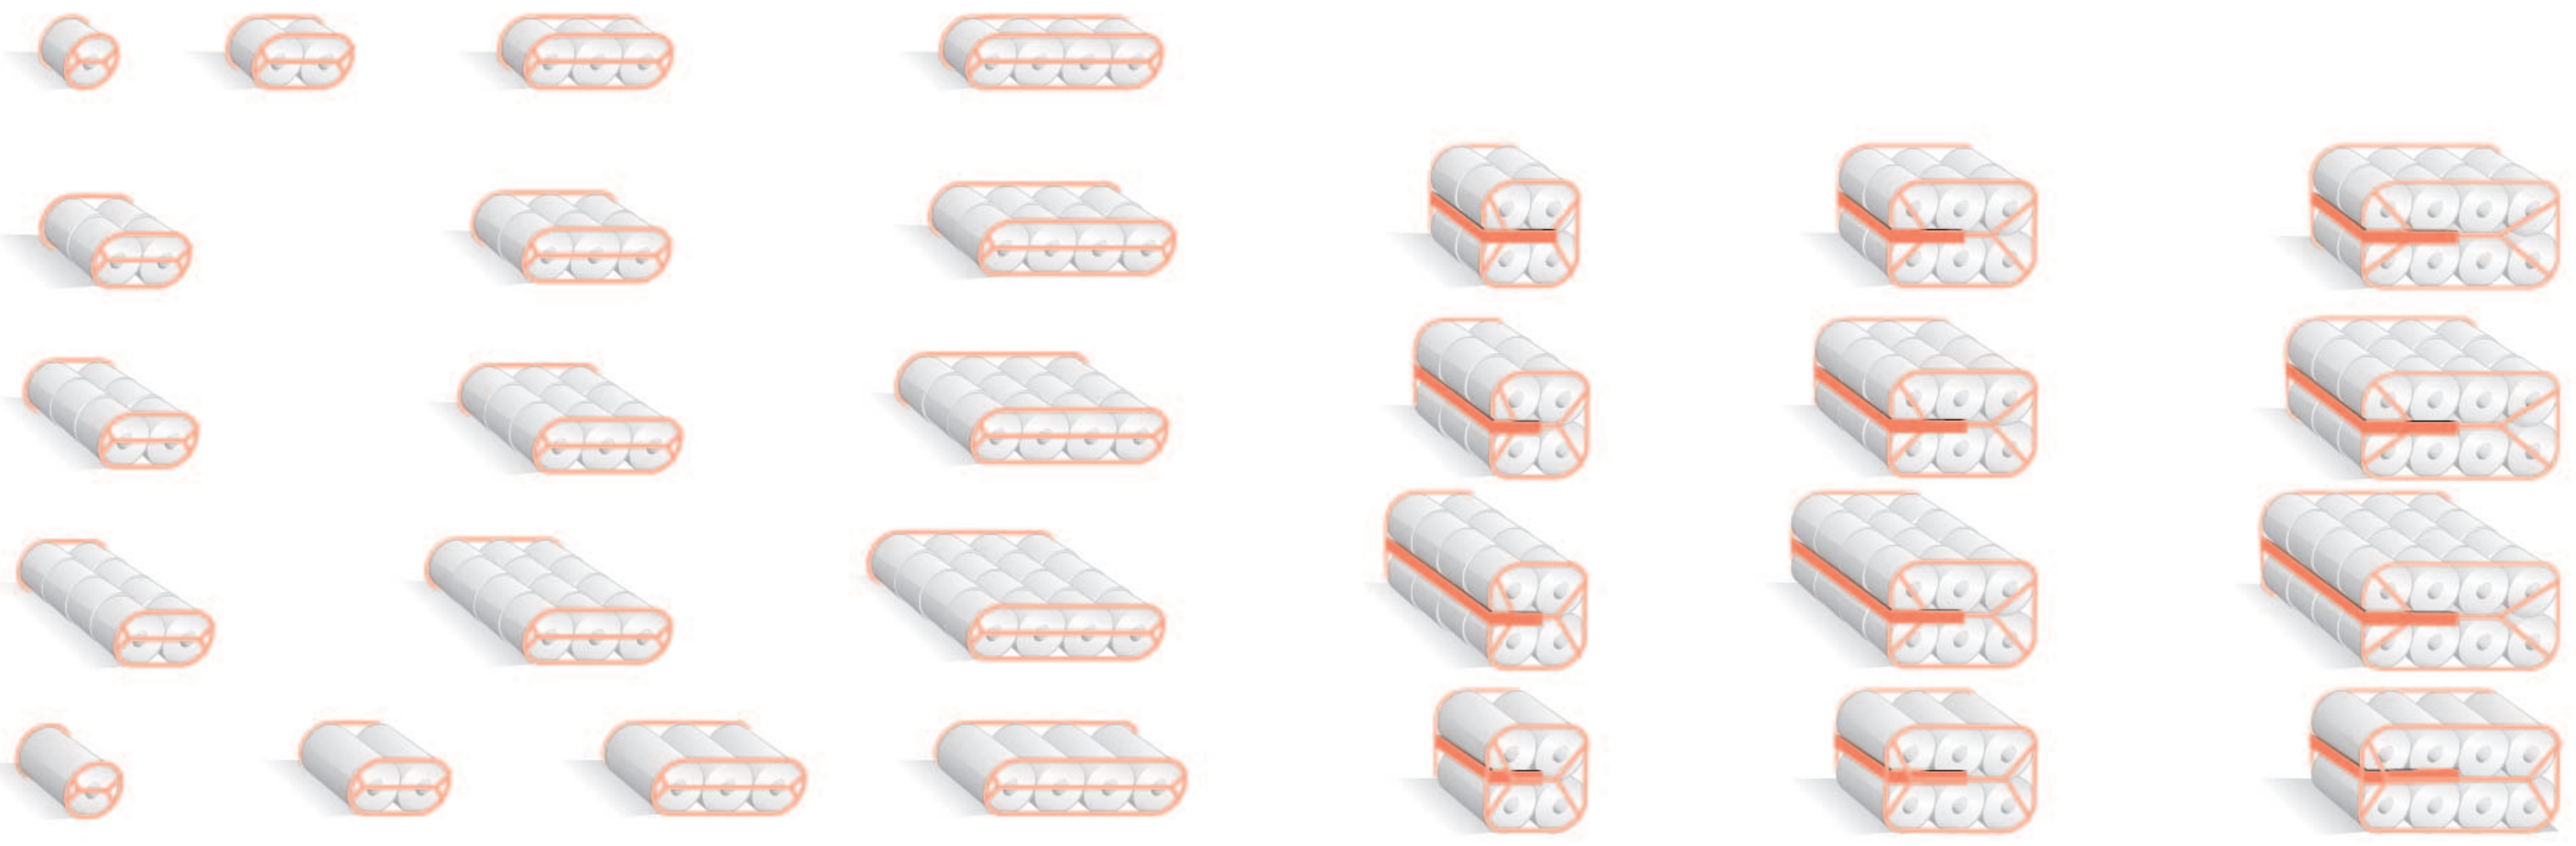

- Wide range of roll diameters and cut-off options
- Inovative motion profiles
- Innovative quick change overhead design
- Complete chain-free transmittions
- Quick change carbon bars
- Easy changoever
- Maintenance-Friendly Access
- Infeed 4 lanes
- From single up to 40 rolls in pack
- Roll diameter up to 200 mm
- Hot melt paper wrapping option
- Lateral perforation for easy opening option
