Change for the better

AURA-AD

Best Overall Equipment Efficiency
in production of adult diapers

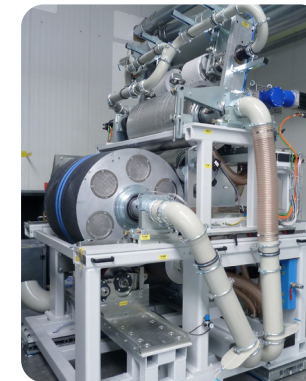

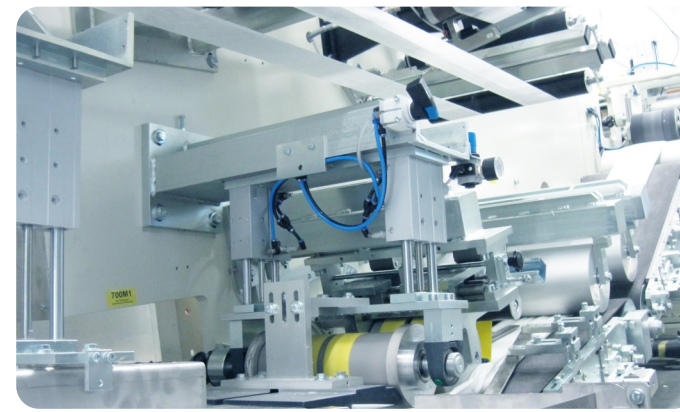

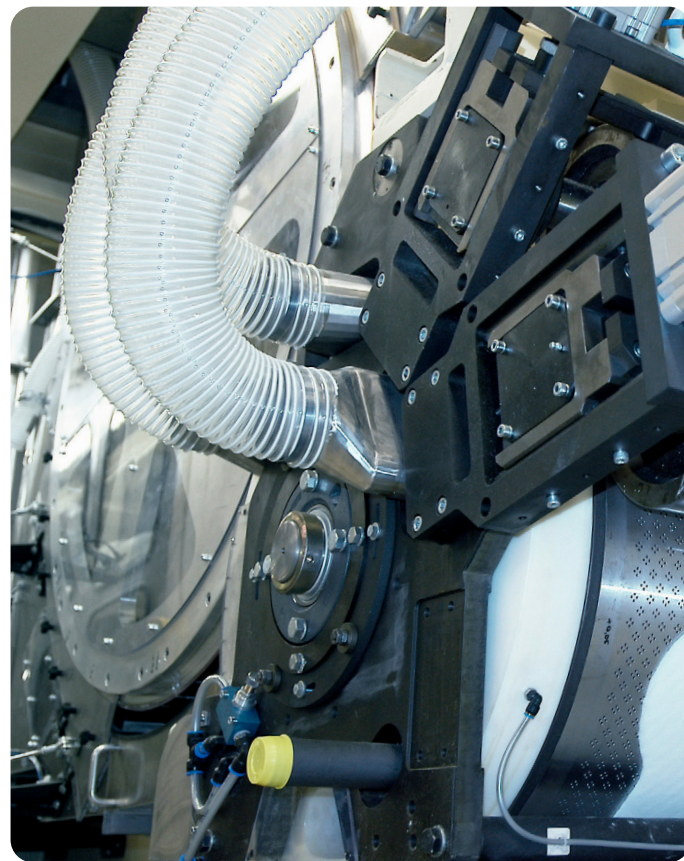

W+D Winkler +
Dünnebier

AURA-AD

Adult diaper production at its best

To manufacture such large products, high overall efficiency requires a sturdy machine design with minimum maintenance and stoptimes. AURA-AD combines such reliability with a high flexibility to keep pace with market development.

- Ultra-discrete cores thanks to HIGH DENSITY calendering (HDC)
- 3-LAYER CORE – soft outside, absorbent inside
- Fastest SIZE CHANGE in the industry
- COMBO OPTION to add adult shaped pads to your production portfolio with only minimum size change

AURA-AD

Prepared for all modern product concepts

Subject to region and tier, different add-on ear designs may be needed.

AURA-AD offers a wide choice of pre-designed options, including many types of ears and belts.

- RECTANGULAR ears for T- or H-shape products
- CONICAL ears for better fit
- Back ears only, or back + FRONT EARS
- ADD-ON BELT or pair of belts, instead of ears

- XXL-Sizes
- ADD-ON EARS for perfect fit
- BIG EAR concept – modern product with minimum process complexity and product costs
- PREFOLDING of ears
- EXTRA FEATURES available

- Front ears made of same or THINNER material than back ears
- Medium to high ABSORPTION levels
- INLINE TXB lamination
- WAIST ELASTIC
- FECAL BARRIER
- ULTRASONIC applications

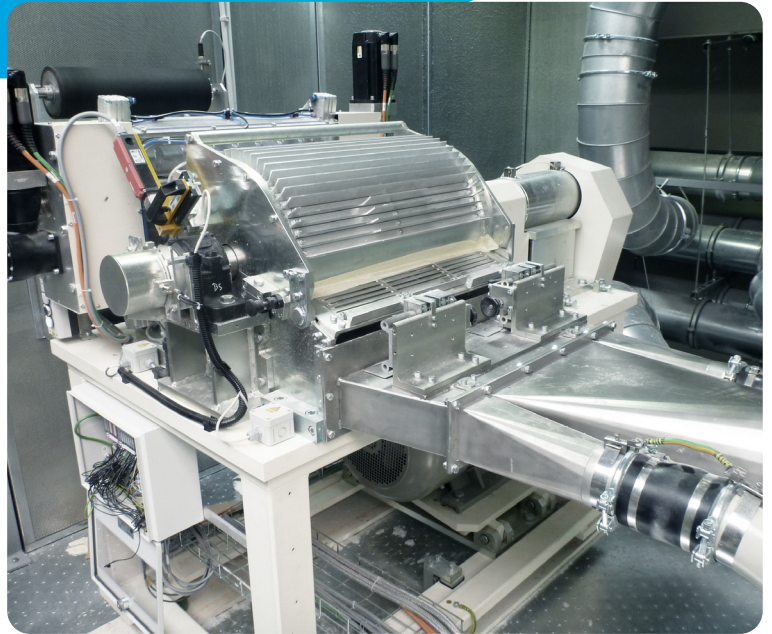

Up to **400** products/minute

Many different shapes + options

Technology EXCELLENCE READY for the future

Size-change and overall efficiency of our AURA-AD lines are outstanding in the market. Together with modern HMI and industry 4.0 solutions, and versatility to cover many different product concepts, this technology provides a quantum leap for your production.

We give you more than just machines – we are your PARTNER from the initial phase of defining the best product + machine concept, through training and start-up phase, up to decades of reliable machine service and upgrades.

Your benefits

- Top FLEXIBILITY granted by a large choice of pre-designed options, plus a deep expertise in creating customized solutions
- VERSATILITY: Many different product concepts are possible on one machine
- Long-lifetime approach: Easy UPGRADE with additional product sizes and product features
- High overall EFFICIENCY thanks to quick size-change concept, inline product-quality control, reliable branded components and a proven machine design
