

## AURA-LI

Flexible, fast and efficient  
machines for light-incontinence products

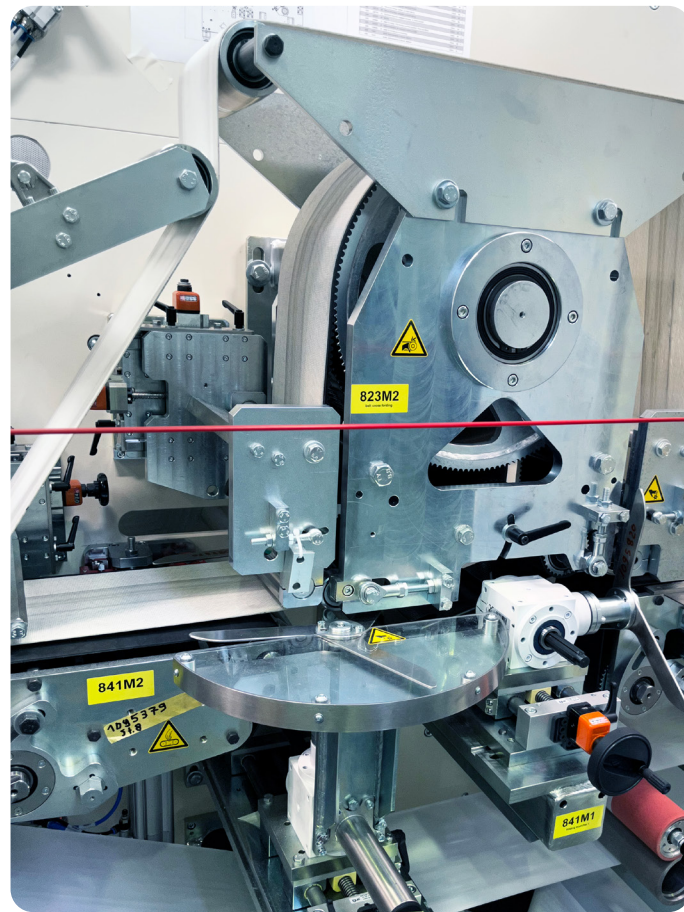

# AURA-LI-F

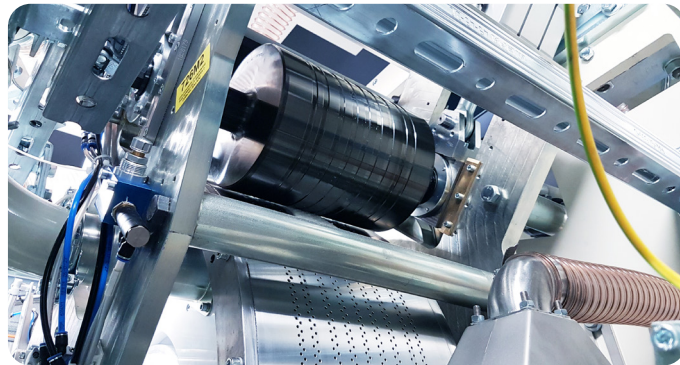

Market-leading technology to produce bladder-control pads of outstanding quality

AURA-LI-F is the answer to your needs in bladder-control pad production.

- High-performance CORES, combining high density HDC and discretion with 3 layers of outstanding performance
- Innovative vacuum system to reduce ENERGY consumption and CO<sub>2</sub> footprint
- CUP-SHAPE providing leakage protection by elastic threads or foam elastic at the sides

- COMBO OPTION to add male guards with straight elastic sides to your production portfolio with only minimum size change
- XL-SIZES
- EXTRA FEATURES available like 2<sup>nd</sup> core, flexoprinting, ultrasonic pattern, inline TXB lamination, and many more

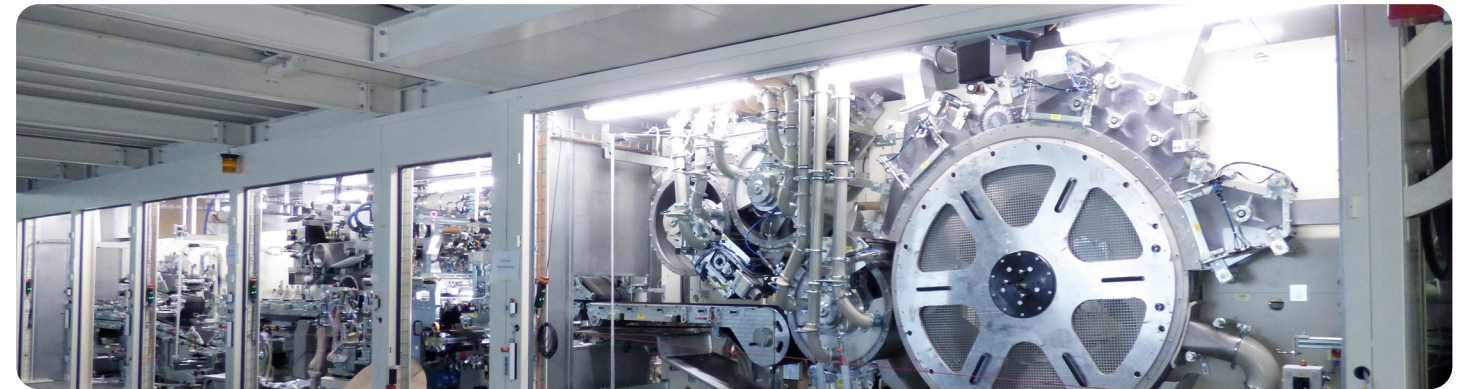

Up to **1600** products/minute

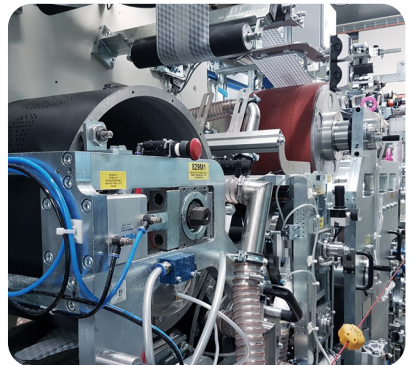

# AURA-LI-M

Manufacture the best performing incontinence protector-pads for men

Production of V-shaped male bladder-protection pads requires extra attention and specialized technology. We are market leaders in this growing segment, offering the best and most versatile machines.

- Perfect product CUP-SHAPE thanks to inclined elastic FOAM stripes at the sides
- Outstanding PRECISION: Foam stretching, cut, repitching and inclination all made in one same process unit
- Fastest size change thanks to one central preadjusted S2S QUICK-CHANGE MODULE containing all major size-dependent units
- XS sizes – ultrathin, discrete, black male protective liners with high-density core HDC
- High ABSORPTION levels enhanced by acquisition layer and 3D core or a 2<sup>nd</sup> core
- Optional bridge-tape to fix folded product sides

Up to **1000** products/minute

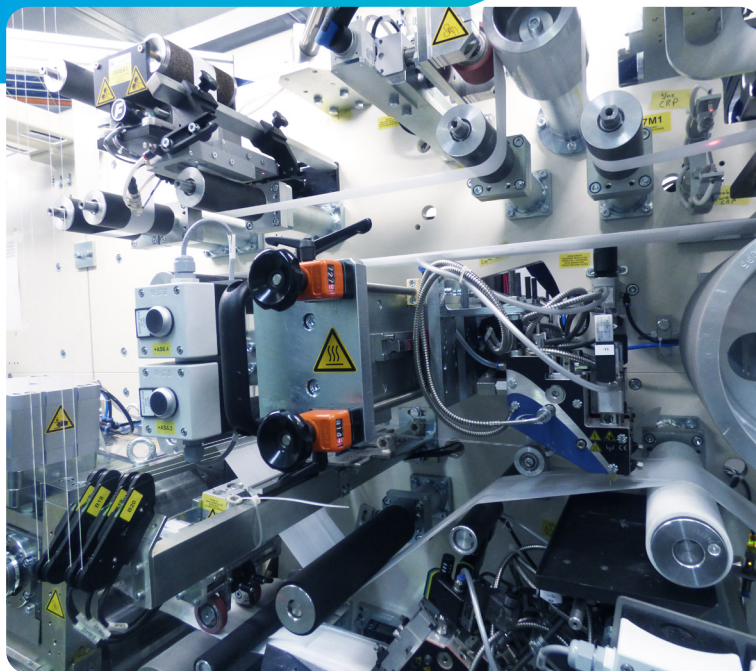

# PERFECT process

# PERFECT product

Since the early dawn of the light incontinence product-segment, we are known as experts in designing best technical solutions for this market. Our AURA-LI machine family lets you have a LEAD over your competitors: Inline flexoprinting, modern HMI and industry 4.0 solutions, and versatility to cover many different product concepts.

We give you more than just machines – we are your PARTNER from the initial phase of defining the best product + machine concept, through training and start-up phase, up to decades of reliable machine service and upgrades.

## Your benefits

- Top FLEXIBILITY granted by a large choice of pre-designed options, plus a deep expertise in creating customized solutions
- End-of-line VERSATILITY: Folded non-wrapped / single-wrapped in nonwoven, biofilm or paper
- Long-lifetime approach: Easy UPGRADE with additional product sizes and product features
- QUICK size-change
- High overall EFFICIENCY thanks to quick size-change concept, inline product-quality control, reliable branded components and a proven machine design
